documentation.wazuh.com/current/installation-guide/wazuh-agent/wazuh-agent-package-windows.html
wazuh.
Version 4.14 (current)
Installation guide / Wazuh agent / Deploying Wazuh agents on Windows endpoints
systems ranging from Windows XP to the latest versions, including Windows 11 and Windows Server 2022.
Note You must have administrator privileges to perform the installation.
1. Download the Windows installer to start the installation process.
2. Select the installation method you want to follow: command line interface (CLI) or graphical user interface (GUI).
CLI
GUI
1. Choose one of the command shell alternatives to deploy the Wazuh agent on your endpoint. Run the command below and replace the WAZUH_MANAGER value with your Wazuh manager IP address or hostname. Ensure the downloaded Wazuh agent installation file is in your working directory.

This folder is empty. Create a new scan.

## Welcome to Nessus Essentials

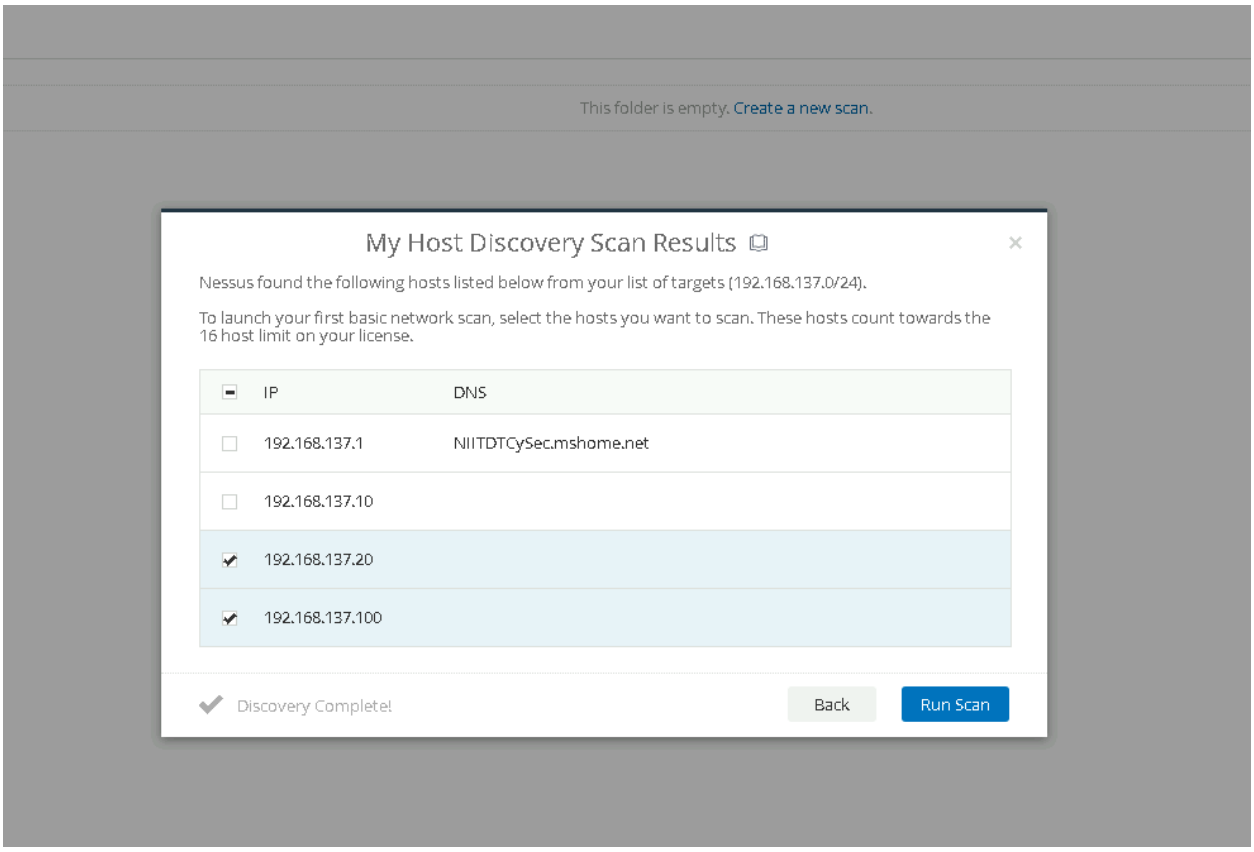

To get started, launch a host discovery scan to identify what hosts on your network are available to scan. Hosts that are discovered through a discovery scan do not count towards the 16 host limit on your license.

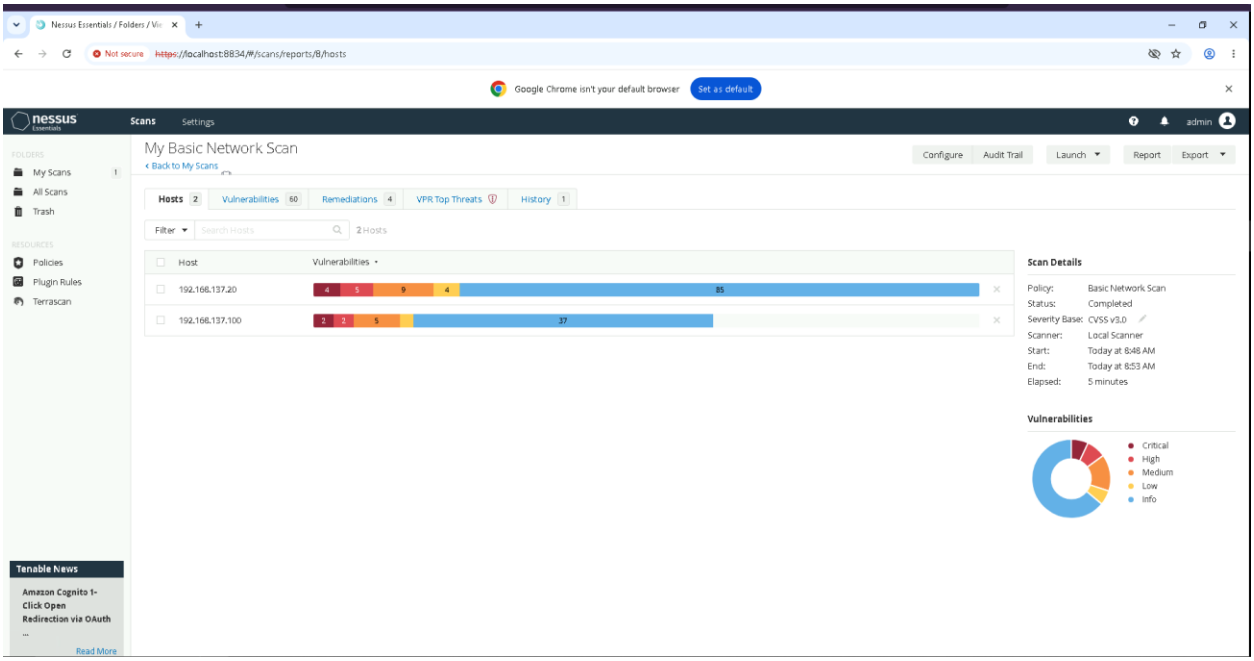

Enter targets as hostnames, IPv4 addresses, or IPv6 addresses. For IP addresses, you can use CIDR notation (e.g., 192.168.0.0/24), a range (e.g., 192.168.0.1-192.168.0.255), or a comma-separated list (e.g., 192.168.0.0, 192.168.0.1).

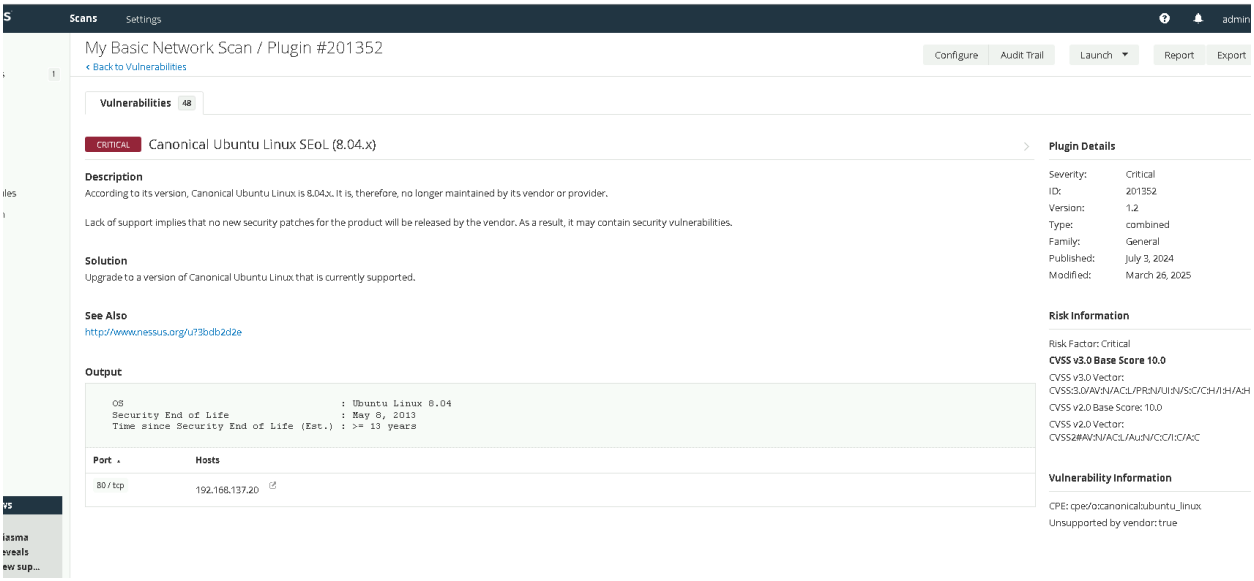

**Targets**

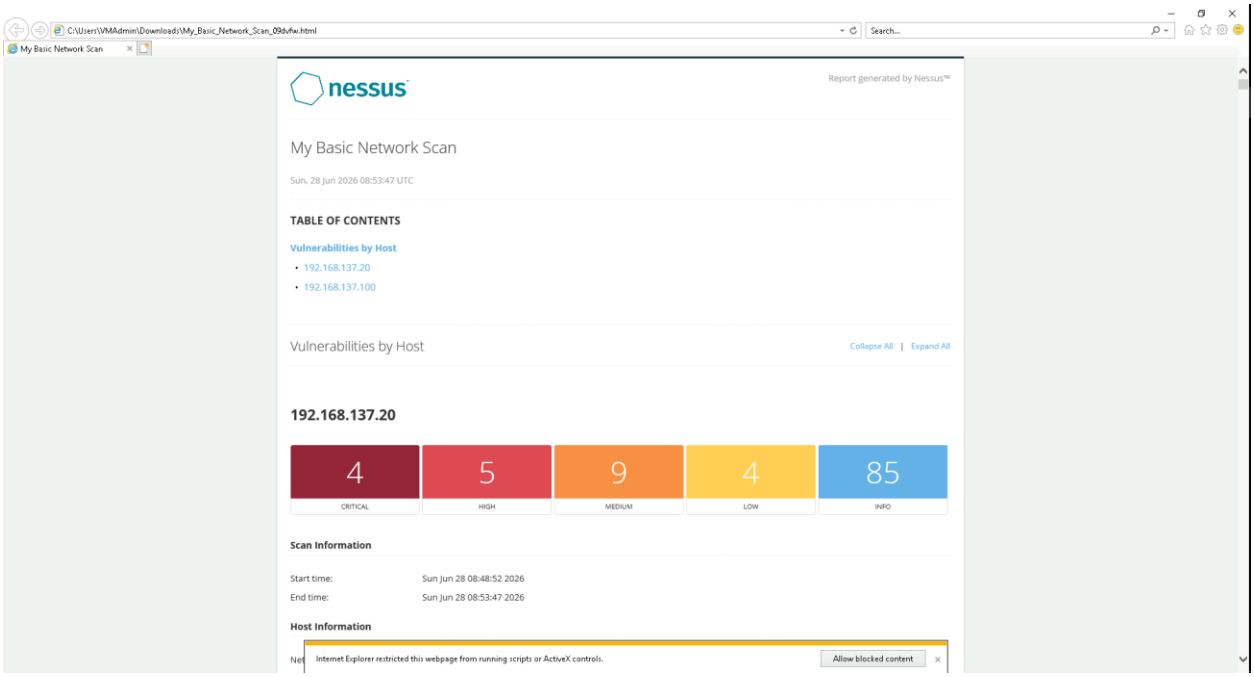

192.168.137.0/24

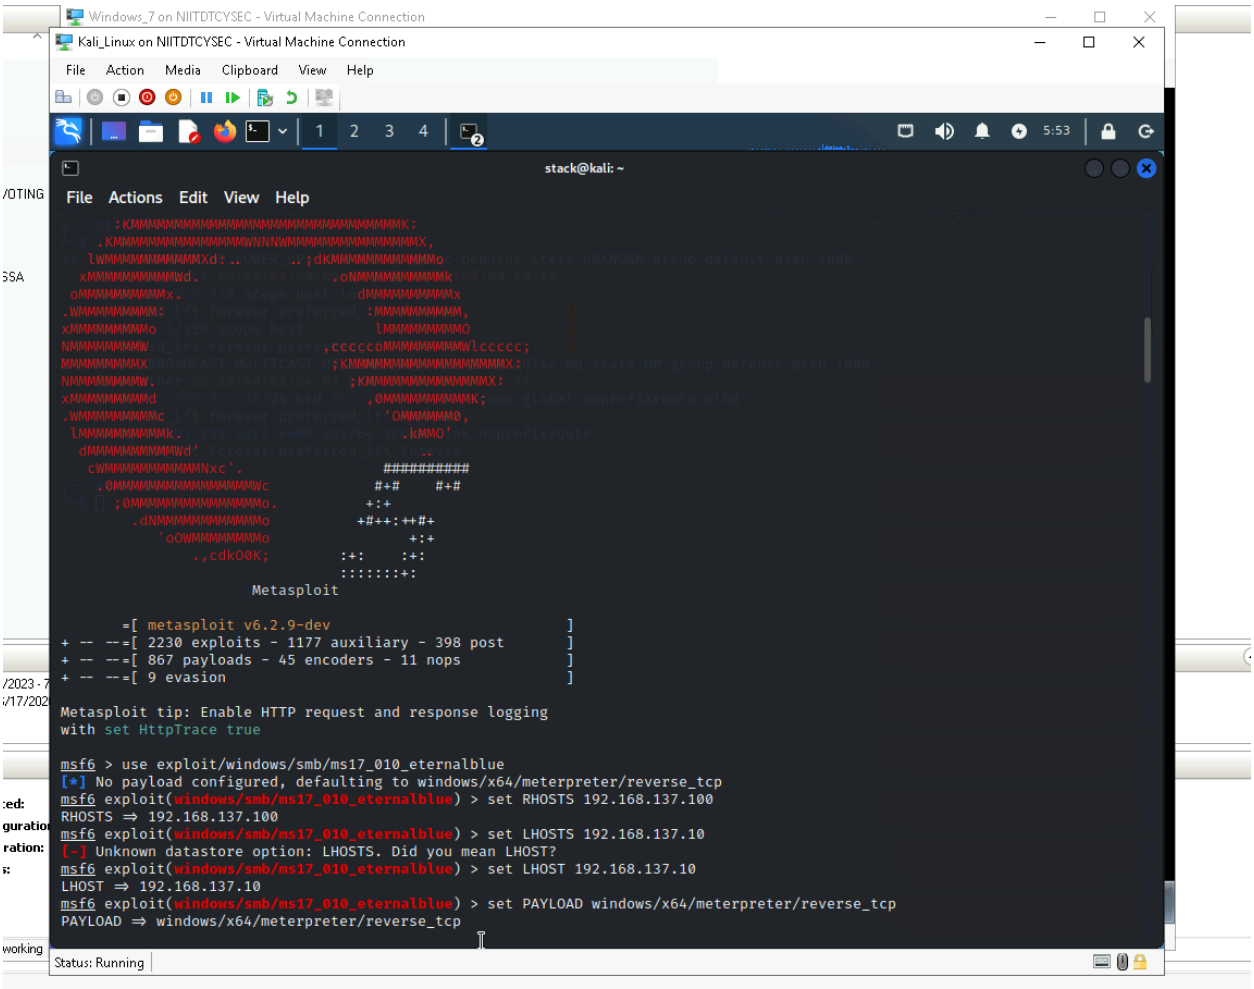

Close | Submit

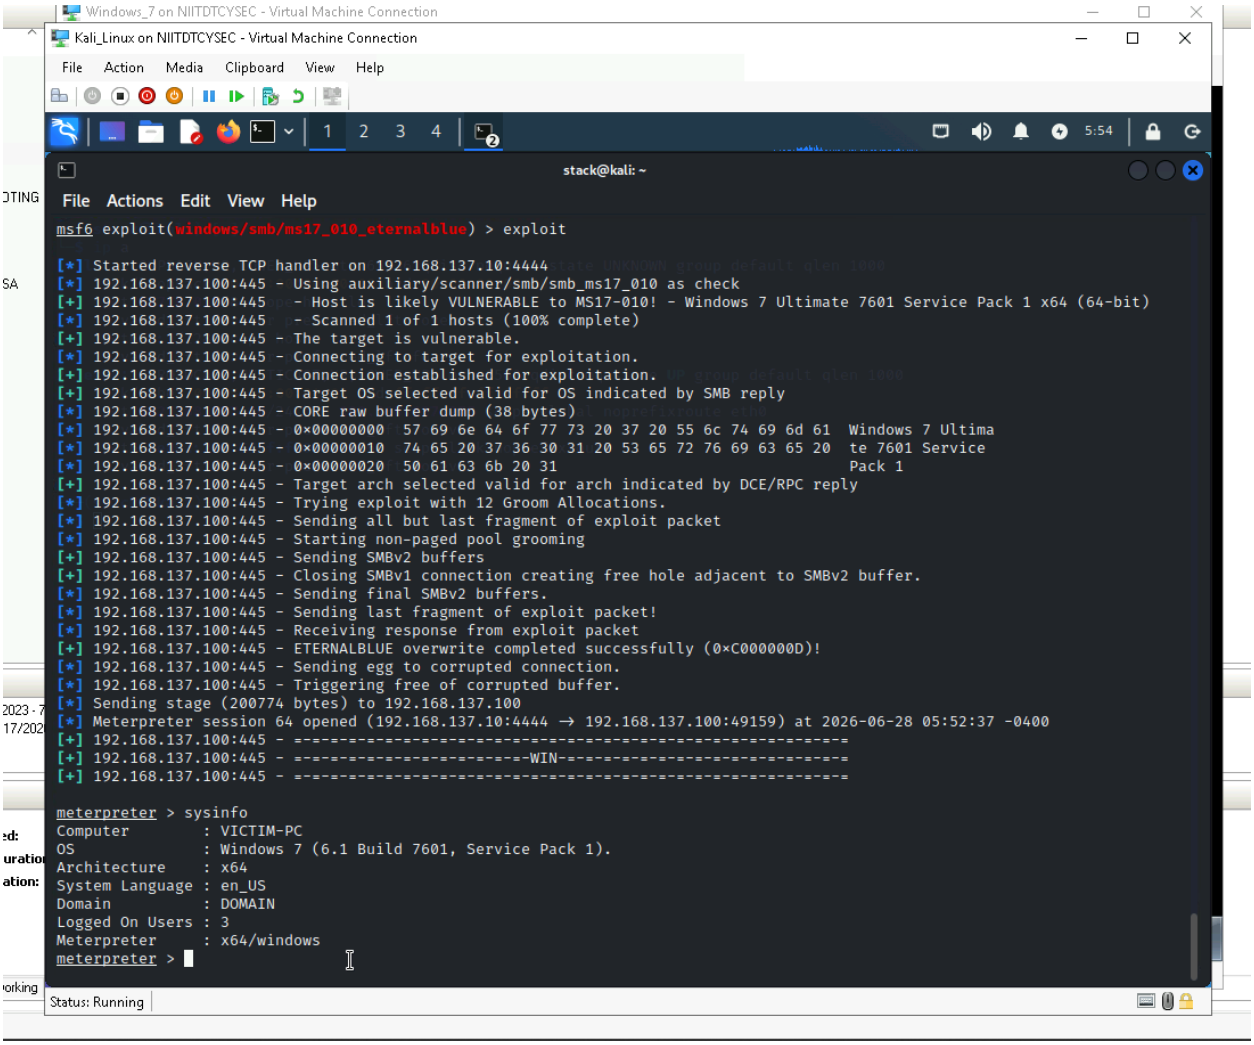

This folder is empty. Create a new scan.
My Host Discovery Scan Results
Nessus found the following hosts listed below from your list of targets (192.168.137.0/24).
To launch your first basic network scan, select the hosts you want to scan. These hosts count towards the 16 host limit on your license.

Canonical Ubuntu Linux SEoL (8.04.x)
Description
According to its version, Canonical Ubuntu Linux is 8.04.x. It is, therefore, no longer maintained by its vendor or provider.
Lack of support implies that no new security patches for the product will be released by the vendor. As a result, it may contain security vulnerabilities.
Solution
Upgrade to a version of Canonical Ubuntu Linux that is currently supported.

Action
Specify the action to be taken when a connection matches the conditions specified in the rule.
Steps:
Rule Type
Protocol and Ports
Action
Profile
Name
What action should be taken when a connection matches the specified conditions?
Allow the connection
This includes connections that are protected with IPsec as well as those are not.
Allow the connection if it is secure
This includes only connections that have been authenticated by using IPsec. Connections will be secured using the settings in IPsec properties and rules in the Connection Security Rule node.
